"Rouge River Revived is the story of how people overcame apathy and are working together to bring their river and its watershed back to life," says John. "It also will surely inspire and give hope to all working to restore and protect watersheds in the place they call home."

John H. Hartig serves as a Visiting Scholar at the University of Windsor's Great Lakes Institute for Environmental Research, as the Great Lakes Science-Policy Advisor to the International Association for Great Lakes Research, and as a member of the Board of Directors of the Detroit Riverfront Conservancy.
